

1. Use Tomix "Wide Tram" track sections for all wide pieces shown. Trim street surface where sections overlap at turnout routes.
2. Pave Mini-Points turnouts and S33 short straights using Tomix 3079 Tram Rail Accessories Kit 2.
3. Vary length and width of city blocks by changing straight sections.
4. Fill in centers of "T" intersections using black foamboard.
5. Connect electric turnouts and sensors to Tomix 5563 as labeled. Connect power feeds directly to power pack, not through Tomix 5563.
6. For details and to see various operations, see YouTube videos:
